Abuse and Neglect of Children and Adults with Developmental Disabilities: A Course for Health and Other Professionals

Start-up Instructions:

Step 1: Insert the Compact Disc into the CD-ROM drive

Step 2: From the Windows Desktop, double click the My Computer icon

Step 3: Double-click the icon representing your CD-ROM drive (D:, E:, F:, etc)

Step 4: To install the Flash Player double-click on the Install Flash Player 7 Icon. If Flash Player is already installed, go to Step 5.

Step 5: Double-click the icon titled 3-Startprogramhtm.htm to start the course.

Adobe Flash Player problems accessing the Text/Video and the Audio/Video Versions:
You will get an error screen that states:

Adobe Flash Player Security

 Adobe Flash Player has stopped a potentially unsafe operation

 The following local application on your computer or network:
  (Your CD-ROM Drive ie E):\program\vhome.swf
 Is trying to connect with this Internet-enabled location:
  (Your CD-ROM Drive ie E):\program\home.swf

 To let his application communicate with the Internet, click Settings.
 You must restart the application after changing your settings

    OK   Settings…

Click the Settings Box on this pop-up error

Clicking this brings up a new internet browser that takes you directly to "Flash Player Help: Global Security Settings Panel" page.

On this page there is a box near the top that says:

Adobe Flash Player Settings Manager
Global Security Settings

Instructions:
You want to click the circle to the left of "Always Allow" (the center selection), until the little black dot appears in that circle.

To finalize this as your selection: click the 3rd tab along the top of the box (an earth with a padlock)

Now close the internet browser and the opened program if you haven't already done so.

Now you can go through Steps 1-5 of the start-up instructions again.
